Date of Birth : 18/04/1993

Work Experience

1. Dates : December 2020 – Present
Position : Front End Developer
Duties : Website Design & Website Development

- Front end developer developing visually appealing and user-friendly interfaces by writing clean, elegant and efficient code.
- Proficient in HTML, CSS, Javascript, React, Git, Figma, Photoshop.
- Designing and developing e-commerce websites for clients.
- Identifying and solving front end challenges.

I was responsible for crafting the front-end of an e-commerce website for a client, employing a range of languages including JavaScript, HTML, and CSS, along with utilizing libraries like React. To enhance user experience, I incorporated UI and UX principles, ensuring a seamless interaction. Additionally, I implemented responsive design to adapt to various devices. For effective organization and updates, I utilized Git as a version control tool.

2. Dates : April 2017 – Present
Employer : ENVO Global Trading Sdn Bhd
